

# The Web & The Not for Profit Sector

Simple Net is a Web Site Hosting, Design, Development and Management company with extensive experience in servicing not for profit organisations (featured below are some examples of our work).

## Does your organisation have a Web Site?

**No!** Did you know that a web site is an extremely powerful administrative, informative, marketing and fund generating tool! Please refer to our "web site packages" (below) for an indication of the services Simple Net will can provide/assist you with.

**Yes!** If you currently have a web site, Simple Net will provide you with "more sensible" and competitive rates than you are likely to be incurring!

## Is your Web Site working for you?

**No!** Simple Net will assist you in reducing your web site related costs, improving traffic to your web site (as achieved for Volunteering Victoria) and offer you a number of service agreements for enhancements to your web site as alternatives to pay by the hour development and maintenance.

## What are the advantages of a Web Site?

- A web site will **decrease administration costs** by creating a central dipository for members and/or affiliated organisations.
- A web site is a valuable on-line information/service provider for the public/members.
- A web site has the potential to **increase** your member base.
- A web site will **increase** your organisations audience base, gaining both, international and national exposure/support.
- A web site will establish and reinforce your image, identity and presence.
- A web site will provide you with access and exposure to a world wide audience.
- A web site will allow your members and target audience to view, access and enquire about your services.
- A web site will provide mass exposure of your services, fund raising, events, newsletters, research and work.

## Web Site Packages: From \$550
